

# ASTRONAUT EGG RULES

Your mission; if you choose to accept it, is to build a spacecraft. Your Patrol will create a spacecraft out of supplies found around camp. You will receive an egg (it will represent an astronaut) to launch in your spacecraft. Your spacecraft must safely land the “astronaut” after it is launched high into the air by a six foot slingshot.

## THESE ARE THE RULES YOUR PATROL NEEDS TO FOLLOW

1. You must pick up your egg at the Ramada Grande after lunch on Saturday. (There is only 1 egg per patrol)
2. Only items found in camp can be used.
3. Rockets must be built on-site they can NOT be brought from home.
4. If it is not from your gear you must ask to use the item for your spacecraft
5. The kitchen is off limits.
6. Violators will be disqualified.
7. Once the spacecraft is given to the judges you may not touch it until instructed to do so.

The winning spacecraft will be the one that goes the furthest without breaking the egg.

GOOD LUCK!
